Using Grids in Interface Designs

Grids help designers create cohesive layouts, allowing end users to easily...

NN nngroup.com

Module grids are created by positioning horizontal guidelines relative to the grid. This governs the whole document. Baseline grids serve to anchor all (or nearly all) elements to a common rhythm.	When you want to position all page elements in relation to the baseline grid. Don't force it, though. Sometimes a layout works better when you override the grid. View the baseline grid when you want to check the position of elements; turn it off when it's distracting.	bottom page margins to absorb leftover lines.
Create a baseline grid by choosing the type size and leading of your text, such as 10-pt Scala Pro with 12 pts leading (10/12). Avoid auto-leading so that you can work with whole numbers.	Check for baseline alignment when you set the baseline grid in your document preferences. Adjust the top or bottom page margin to absorb any space left over by the baseline grid.	To style headings, captions, and other elements, choose line spacing that works with the baseline grid, such as 18/14 for headlines, 14/8 for subheads, and 8/12 for captions. (Web designers can choose similar increments [line height] to create style sheets with coordinated baselines.)
Determine the number of horizontal page units in relation to the number of lines in the baseline grid. Count how many lines fit in a full column of text and then choose a number that divides easily into the...	In Design, set the baseline grid in the Preferences>Grids and Guides window. Create horizontal divisions in Layouts>Create Guides. Make the...	bottom page margins to absorb leftover lines.

Spacing

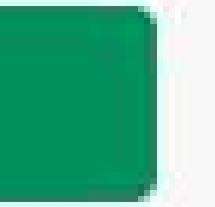

alignment

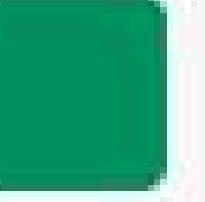

The diagram illustrates the concept of alignment in UI design through two side-by-side user profile cards. Both cards have a white background with rounded corners and a black border.

Left Card (Incorrect Alignment): A red circle with a red 'X' is positioned at the top center. The profile picture of a man is centered above the name. Below the name, a dotted line connects the profile picture to the text block. The text block contains placeholder text: "Amet minim mollit non deserunt ullamco est sit aliqua dolor do amet sint. Velit officia consequat duis enim velit mollit. Exercitation veniam consequat sunt nostrud amet." Below the text is a row of five heart icons: three red ones on the left and two blue ones on the right. A vertical dotted line aligns the center of the profile picture with the center of the first three red hearts.

Right Card (Correct Alignment): A green circle with a green checkmark is positioned at the top center. The profile picture of the same man is centered above the name. The text block contains the same placeholder text. Below the text is a row of five heart icons: three red ones on the left and two blue ones on the right. In this version, there is no vertical dotted line; instead, the entire row of hearts is aligned to the right of the profile picture, creating a consistent visual weight and balance.
